

Publisher and duration of the contract	<i>Wiley (2020-2023)</i>
Disciplinary areas covered	Multidisciplinary
Characteristics of the contract	Access to all the journals available on the Database Model platform and the possibility for authors affiliated with the Scuola Normale who are also <i>corresponding authors</i> to publish open-access articles.
Types of articles publishable in open access	<i>Primary research and review articles.</i>
Journals in which publishing in open access is possible	In all hybrid journals included in the <i>Database Model</i> package available on the Wiley Online Library platform. Consult the list .
Workflow for publishing in open access	Upon acceptance of the article on the part of the journal, the publisher identifies the affiliation of the corresponding author on the Wiley Author Services by means of the Ringgold Identifier system, verifying the declaration of affiliation and the SNS e-mail address (@sns.it) inserted and registered at the submission stage of the contribution. The affiliation is verified and validated by the referents of the Scuola Normale. The validation of the <i>corresponding author</i> takes into account the date of acceptance of the article on the part of the publisher independently of the date of the first <i>submission</i> .
APCs cover	The contract does not include a pre-established distribution of the APCs among the subscribing institutions. The APCs are progressively used up until the number available at national level is exhausted. Once the annual quotas are used up, the cost of any added articles is to be borne by the individual authors, with a 20% discount on the list price.
Availability of the APCs for the current year	APCs available
Licence	CC-BY (except with minor exceptions). The author retains the <i>copyright</i> .
Informational support	Italian Agreement with Wiley Authors' guide Online guide CRUI contract signed by the Scuola Normale
E-mail address of the technical referents for the contract	wiley.pubblicazione@sns.it
